PREVIEW

Messaging that's engineered, not improvised.

One workflow across SMS, RCS, and WhatsApp—built with validation, routing, and compliance at the core.

Request Consultation

Send once, route intelligently. The platform handles validation, compliance checks, and channel fallback automatically.

```
nit.send({
  message: "Your code is 4291",
  channels: ["SMS", "RCS", "WhatsApp"],
  fallback: true
});
```

Why it matters

Compliance and deliverability protect both customer trust and long-term performance. We help you get it right from the start—including RCS Business Messaging verification and WhatsApp Business API template workflows.

Common questions

Do you support registration and verification?

How do you handle opt-out & compliance?

What's the difference between SMS and RCS?

Can we start with a pilot?

Tell us your use case. We'll propose the right channel mix.

Share your goals and timeline—get a rollout plan built around compliance and performance.
